A screenshot of a Mate Terminal window titled "Mate Terminal". The window has a menu bar with "File", "Edit", "View", "Search", "Terminal", and "Help". The terminal shows a series of commands and their outputs. The user starts in the "Lab01" directory and lists files, showing a mix of video files (film*.avi, snap*.jpg) and music files (song*.mp3). They then use the 'mv' command to move all *.mp3 files to the "Music" directory, all *.jpg files to the "Pictures" directory, and all *.avi files to the "Videos" directory. Finally, they list the files again to show the organized state: "Music" contains song files, "Pictures" contains snap files, and "Videos" contains film files.
